XM Radio provides the quality and variety that are not available from the local cookie cutter stations that have annoying and offensive DJs. I find XM radio to be so much better than local radio, that I am voting with my pocket book and have two XM receivers that I pay a monthly fee for rather than having to be subjected to bland local radio for free.

Please do not restrict satellite radio's ability to provide new content and quality that I am willing to pay for. I resent the fact that NAB is petitioning to prevent me from receiving a service that I want and that they are failing to deliver.

If anything, XM should be allowed to provide additional content and services XM should not be restricted.

Regards,
Dave Gerathy
